

THE TOSOH THREE

in
Purification
 like never before.

A story full of stressfree selectivity, high binding capacity, and high salt tolerance. And much more!!!

It was just a regular morning. SuperT was reading his daily newspapers, when suddenly...

Friends! Listen!!!
 We have to save our antibody-buddies!!!

EXCLUSIVE

Antibodies attacked by aggressive conventional purification methods!

Watch the blockbuster Tosoh movie.

NEW

HURRY UP!!!
 We have to save them all!

EXCLUSIVE

And so the Tosoh three knew what they had to do - make a difference in the antibody world.

Here we are! The greatest team of purification experts the world has ever known!
 The Tosoh three!

And so the Tosoh three start their process to absolut purity: First capturing on protein A followed by cation-exchange and anion-exchange. Sometimes they even went directly from Protein A to NH₂-anion exchange!

Let our antibody buddies discover a stress-free selectivity...

... combined with high binding capacity...

... without much preparation.

On top of it, we will increase the productivity...

Protein A

Let us give the antibodies a new experience...

SULFATE

NH₂

... of a very own cleaning process.

... all of these leading to reduced production costs.

FOLLOW US...
 ...AND START WITH THE PROTEIN A-CAPTURING.

ANTIBODIES! PAMPERED!

Absolute purity
