CHROMATOGRAPHY IN PROCESS DEVELOPMENT AND PRODUCTION

- Practical Workshop & Theory -

November 27 - 28, 2018

THE OBJECTIVES

- To provide a comprehensive background to chromatographic purification in bioprocessing as an integrated process technique
- To examine how process method development translates into a productive and cost effective manufacturing process
- To explore internal communication and responsibility, together with the impact of external regulatory demands on modern biopharmaceutical manufacturing
- To provide a balance of effective presentations and practical hands-on experience with process scale and method development under the guidance of qualified tutors.

WHO SHOULD ATTEND?

Bioprocess Project Managers, Bioprocess Development Scientists, Process Engineers, and all persons interested in Downstream Processing

Venue: Tosoh Bioscience GmbH, Griesheim, Germany

Language: English

Registration: www.tosohbioscience.de ⇨ Calendar of events

The workshop fee of EUR 1,450.00 plus 19% V.A.T. includes full workshop documentation, coffee breaks, lunches, one dinner, plus a small excursion.

Organiser:

Tosoh Bioscience GmbH, Im Leuschnerpark 4, 64347 Griesheim, Germany
