## **OPERATING CONDITIONS and SPECIFICATIONS**

## TSKgel<sup>®</sup> Chelate-5PW Products

 Part Numbers:
 0008645
 7.5 mm ID x 7.5 cm L
 10 μm

 0014440
 5.0 mm ID x 5.0 cm L
 Glass
 10 μm

0014440 5.0 mm ID x 5.0 cm L Glass 0008647 Guardgel Kit

This sheet contains the recommended operating conditions and the specifications for **TSKgel** Chelate-5PW columns. Installation instructions and column care information are described in a separate Instruction Manual.

## A. OPERATING CONDITIONS

Shipping Solvent: 10 mM Sodium Acetate (pH 4.5) buffer

NOTE: Wash the column with water before loading the column with metal ion.

. Max.Flow Rate: 1.0 mL/min 5.0 mm ID x 5.0 cm L Glass

1.2 mL/min 7.5 cm ID

NOTE: When a buffer with high viscosity is used, the maximum flow rate may have to be reduced so

as not to exceed the maximum pressure drop. When changing solvents, use a flow rate

equal to 25% of the maximum flow rate.

3. Standard Flow Rate: 0.5 - 0.8 mL/min 7.5 mm ID x 7.5 cm L

0.5 - 1.0 mL/min 5.0 mm ID x 5.0 cm L Glass

4. Max. Pressure: 1 MPa 5.0 mm ID

2 MPa 7.5 mm ID

5. pH Range: 2 - 12 pH above 12 can only be used for a short time

6. Salt Conc.:  $\leq$  3 Molar

7. Organic Conc.:  $\leq 20\%$ .

8. Temperature:  $\leq 45^{\circ}C$ 

O. Cleaning Solvents: (1) 0.1-0.2 M NaOH, or

(2) 20-40% acetic acid aq.

(3) Aqueous buffer in organic solvent, or, if nothing else was successful,

(4) Urea or non-ionic surfactant in buffer

NOTE: Clean the column regularly by injecting up to one column volume

0.1~M NaOH in 250 -  $500\mu\text{l}$  increments.

10. Storage: Store the column in a neutral pH buffer containing 0.02% NaN<sub>3</sub> at a temperature between 4°

C and 10°C when it will not be used the next day. For overnight storage flush the column

with the mobile phase at 0.2 ml/min. Prevent air from entering the column!

11. Regeneration: Remove the metal ion using an aqueous solution of 50 mM EDTA in 0.5 M NaCl before

reloading the column with metal ion.

12. Column Protection: Guard columns prolong the life of the analytical column. Guard column life depends greatly

on sample cleanliness. As a general rule, guard columns are replaced after 30-40 sample injections, when the peaks become excessively wide, or when the peaks show splitting.

B. SPECIFICATIONS

The performance of TSKgel Chelate-5PW columns is tested under the conditions described in the

Data Sheet. All columns have passed the following quality control specifications

Number of Theoretical Plates (N):  $\geq$  1,300 7.5 mm ID x 7.5 cm L

500 5.0 mm ID x 5.0 cm L Glass

Asymmetry Factor (AF): 0.7 - 1.6 5.0 mm ID x 5.0 cm L Glass

0.8 - 1.6 other columns
